Project Setup Guide

1. Activate the Virtual Environment

To activate the virtual environment, use the following command:

```
source venv/bin/activate   # On macOS/Linux
.\venv\Scripts\activate    # On Windows
```

2. Run the Django Server

To start the Django development server, use the command:

```
python manage.py runserver
```

3. Access the Application

Open your web browser and navigate to http://127.0.0.1:8000/ to view your running application.

That's it! Your project is now set up and ready to use.
